

MICHAL MIKULENKA

Web Developer | Frontend & Python

About Me

I am a web developer focused on modern frontend and backend technologies.

I work with HTML, CSS (Tailwind), JavaScript, React, Python, and Django.

I build structured and maintainable web applications with emphasis on clarity, usability, and long-term sustainability.

Before transitioning into tech, I worked as a principal French horn player and section leader in professional orchestras.

This experience shaped my discipline, preparation, and accountability — qualities I now apply to software development.

Recommendation

"Michal collaborates with me on the development of a website, e-commerce platform, and a digital handover system for real estate projects.

The solution significantly improves workflow efficiency for investors, developers, and site supervisors.

He understands requirements in context and translates them into structured, practical solutions.

He acts not only as a developer, but as a dependable partner in system design and implementation."

Denisa Mrázková,
interior slow designer
